Valentine's Meat-Juice

When Ill With
INFLUENZA
OR
PNEUMONIA

INFLUENZA AND PNEUMONIA

FROM extensive medical evidence relative to the usefulness of VALENTINE'S PREPARATION OF MEAT-JUICE, we herewith respectfully submit for your consideration the statements of physicians and surgeons who have themselves taken or used it in their own families when ill with Influenza or Pneumonia.

VALENTINE'S MEAT-JUICE
COMPANY,

Richmond, Virginia,
United States of America.

REPORTS

ROME, *Italy.*

I have used VALENTINE'S MEAT-JUICE in the treatment of patients, and also personally after having been very ill with Influenza, and I must say it is an excellent tonic in conditions of great organic weakness. It is also very agreeable. I have prescribed it with the greatest satisfaction for convalescents and invalids restricted to a liquid diet.

Cavalier Dr. ENRICO BALLERINI,

*Late Surgeon to the Hospital of Rome; Physician
to the Press Association of Rome.*

NEW YORK, N. Y.

I have been down with that wretched disease, Influenza. I used VALENTINE'S MEAT-JUICE when nothing else seemed to be relished. I consider this an assurance of my confidence in it.

O. B. DOUGLAS, M. D.,

Ex-President Medical Society County of New York; Professor Diseases of Nose and Throat, New York Post-Graduate Medical School and Hospital, New York City.

BIRMINGHAM, *England.*

I have been in the habit, for years, of using the valuable preparation, VALENTINE'S MEAT-JUICE, in all exhausting diseases, particularly in the wasting diseases of children and of Typhoid Fever. I can speak personally concerning Typhoid Fever, as last year I had a very bad attack, being in bed four months and having a very bad relapse after six weeks, complicated with pneumonia, and I owe my recovery to your very valuable preparation, as all other meat-juices and home-made beef-tea, broths, etc., and also milk could not be retained, and it was only on your preparation I lived for a week or ten days. I have also found that children, suffering from advanced conditions of Marasmus, with vomiting and diarrhoea, retained VALENTINE'S MEAT-JUICE when all other food was rejected. I shall continue to use the MEAT-JUICE in my practice, and I am very glad to bear witness to the value of your preparation.

H. S. COOK,

Med. Officer to the North-west District of the Birmingham Post-Office.

PROVIDENCE, R. I.

VALENTINE'S MEAT-JUICE was the only nourishment retained by my five-year old daughter during an attack of Pneumonia. I consider that it saved her life, and believe it to be the best product of its kind on the market.

WILLIAM H. PETERS, M. D.,

*Admitting Physician Camp for Consumptives,
State of Rhode Island.*

SPENCER, N. Y.

I have used VALENTINE'S MEAT-JUICE in cases of acute and serious troubles, not only among my patients, but in my own case after a severe illness from La Grippe and Inflammatory Rheumatism, both during the course of the disease, and in convalescence, when I could not take much of anything else. I have also found that when I get very weak from overwork and cannot eat and retain enough to keep me up, VALENTINE'S MEAT-JUICE will give me an appetite for other food which will be retained by the stomach when it would otherwise be resisted. I consider VALENTINE'S MEAT-JUICE the best food in cases of extreme weakness from any cause, and especially in weak and sensitive conditions of the stomach that I have ever seen.

G. W. DAVIS, M. D.

ECCLES, *England.*

When I suffered from Pneumonia about two years ago, I myself, took VALENTINE'S MEAT-JUICE, and it undoubtedly helped me to recover.

ANDREW SPEARING,

Hon. Surg. St. John's Ambulance Association.

VALENCIA, *Spain.*

I have known and used VALENTINE'S MEAT-JUICE on many occasions and for many years and always with the most satisfactory results. I was desperately ill with a stubborn attack of grippal Pneumonia, and during my convalescence from said illness I used VALENTINE'S MEAT-JUICE. The results were extremely satisfactory, as the excessive debility was soon ameliorated and the period of convalescence made relatively short, thanks as I have before said, to this good preparation. This incited me to confirm my experience by using it in my clinics as well as among my private patients, and I always obtained equal or better results. I also utilized it in the case of a son of mine who had been operated upon for inflammation of the walls of the stomach, in which the suppuration was so great that it left him a veritable anaemic. He took the preparation very readily, as its pleasant taste is always the same, whether it is taken in broth, soup, milk, or even in a little hot water, and its good effects were quickly seen.

Dr. E. BELTRAN.

MANCHESTER, *England.*

I have used "VALENTINE" for a good number of years, both in my practice and for personal use. In fact, when I had Pneumonia five years ago, VALENTINE and champagne kept me going. I prescribe it constantly and shall continue to do so, so long as it keeps up its present high state of excellence.

A. T. LAKIN,

Late House Surgeon Oldham Infirmary.

SAINT CHINIAN, *France.*

I have tried VALENTINE'S MEAT-JUICE with patients weakened by attacks of Influenza with Phthisis whose digestive tract was out of order, and also generally with patients who had become debilitated on account of some past or present diseases. I also tried VALENTINE'S MEAT-JUICE with my own little boy about two years old who had enjoyed full health, but was suddenly attacked by infectious Pneumonia (lobar Pneumonia). He was very seriously ill during fully nine days, with a temperature 40° (104°) and as many as 160 to 180 pulsations, not to mention several complications which set in. The Pneumonia reached its end in the night of the 9th to 10th day. Treatment, mustard plasters, bath at 28°, 30° every three hours, night and day, lasting from 10 to 15 minutes. As nourishment, VALENTINE'S MEAT-JUICE. At the end of his short but very serious malady my little boy was neither weakened nor grown thin. VALENTINE'S MEAT-JUICE had admirably kept up his strength without affecting the classic course of the malady.

Dr. E. COULOUMA,

Late Assistant Physician to the Public Insane Asylum at Montdevergues.

PHILADELPHIA, *Pa.*

I order VALENTINE'S MEAT-JUICE for patients almost every day. I have lived upon it for weeks myself, while convalescing from Pneumonia and I know of its great value.

SAMUEL W. BURNS, M. D.

RICH HILL, CASTLE, ARMAGH, *Ireland.*

I have been in the habit of prescribing VALENTINE'S MEAT-JUICE for my patients for years, and in my own case, when I had Pneumonia on two occasions, I took it myself with the happiest results.

T. RICHARDSON-GRIFFITHS.

VERDUN, *France.*

I tried VALENTINE'S MEAT-JUICE for my own personal use during convalescence after La Grippe. Taken in doses of one tablespoonful three times a day in fresh bouillon, this preparation gave me rapidly back my vigor and my strength.

Dr. MIALARET,
Army Physician.

NORWOOD, *Mass.*

I have used VALENTINE'S MEAT-JUICE for myself in a weak and debilitated system following a severe case of La Grippe, and from its agreeable and recuperative properties I have recommended its use in all cases of a weak and debilitated system, and especially to children suffering from gastric or bowel complaints. In fact I consider VALENTINE'S MEAT-JUICE the best tonic from babyhood to old age.

FRANCIS M. CRAGIN, M. D.

RICHMOND, SURRY, *England.*

I have used VALENTINE'S MEAT-JUICE in the case of my own little girl who was suffering from extreme exhaustion, amounting, on several occasions, to Collapse after a severe attack of Influenza with Bronchial complications and Anaemia. She refused every form of nourishment except VALENTINE'S MEAT-JUICE, so I consider her life was saved by it, when at a very low ebb. Whenever she looks pale, I procure a bottle for her at my chemist's, and its effects are marvelous after a few doses. I have tried VALENTINE'S MEAT-JUICE also successfully in cases of Measles where all other food produced nausea, and in cases of convalescence from acute diseases. Its rapidity of assimilation and pleasant taste are two of its great advantages. I shall continue to use it largely in my practice.

JANE RUSSELL GRANT,
Late Physician Maternity Charity, S. Acton.

REVERE, *Mass.*

I contracted Pneumonia, and for a number of days the Stomach was so irritable no nourishment was retained except VALENTINE'S MEAT-JUICE well diluted. For a number of years I have been prescribing it as the nutrient par excellence.

EUNICE D. KINNEY, M. D.

EASTBOURNE, *England.*

For years I have recommended VALENTINE'S MEAT-JUICE, and in all cases it has proved satisfactory. I had never tasted it until last May, when I was laid up with Pneumonia and Pleurisy combined. I was splendidly nursed, and of all the various kinds of nourishment during my long illness I distinctly preferred VALENTINE'S MEAT-JUICE. I had it night and day and seriously believe that it was one of the principal means of pulling me through. I felt it so refreshing and satisfying. You can do what you like with this letter, if it is of any good to you. You see I have had an actual, personal trial of it and can speak with certainty and confidence of its value.

J. PITCAIRN BOOKLESS, M. D.

LITTLEMORE, *England.*

I am constantly using VALENTINE'S MEAT-JUICE and find it most useful. I have taken it myself after two severe attacks of Influenza with very beneficial results.

R. H. HEURTHLEY SANKEY,
Med. Supt. Oxford County Asylum.

PHILADELPHIA, *Pa.*

I have used VALENTINE'S MEAT-JUICE in the most serious case of Influenza that I have seen, not to perish, and one in which I had more interest than all others combined; my mother, 67 years of age. I had despaired of her recovery. As auxiliary to other articles used in her case, VALENTINE'S MEAT-JUICE fulfilled all the indications claimed for it. It is acceptable to the stomach and can be administered in such small and effective quantities that the patient scarcely recognizes it. I consider it an important article of the dietary of the sick.

A. C. W. BEECHER, M. D.

LOUGHREA, *Ireland.*

I have had an opportunity, in my own person, of testing the value of VALENTINE'S MEAT-JUICE. I suffered from a rather sharp attack of Influenza, with debility and loss of appetite, on which occasion, when I could take nothing else, I found VALENTINE'S MEAT-JUICE most valuable as a restorative, the more so as the small quantity required to be taken at a time exactly suited the state of my stomach, and in addition the flavor is most agreeable.

P. O'DONOGHUE, M. D.,
Physician St. Joseph's Reformatory.

PARIS, *France.*

In an attack of Grip accompanied by lassitude, I used VALENTINE'S MEAT-JUICE. With this preparation I established a very good appetite and restored my strength very rapidly.

Dr. BOULLAND.
